

Zaner-Bloser *Word Wisdom* Grade 3
Pacing Chart
4 weeks, 5 days a week, 90 minutes each day

In this sample summer school unit, a variety of approaches enable students to develop vocabulary, to experience Latin roots and prefixes in the context of nature study, and to exercise writing skills. The study of movement-related phenomena enlarges the vocabulary of students to enhance the dynamic qualities of their writing. The inherent interest in Venus flytraps and other phenomena of nature lends itself as a topic which is both absorbing and useful, and can be expanded easily into individualized personal projects or reading reports.

Movement/Unit 3: Every day, people and animals are constantly on the move. In this unit, students will learn words related to movement. (*p. T50*)

Living Things/Unit 4: Earth is home to an amazing variety of living things ranging in size from tiny microbes to the enormous blue whale. To appreciate the diversity and complexity of life on Earth, students need a rich vocabulary. In this unit, students will learn vocabulary words related to living things. (*p. T72*)

Through **Unlocking, Processing, and Applying** activities, students will experience:

- deep processing of meaning
- multiple word interactions
- word meanings through context
